PANSY radar collaborative research program: Approved proposals
(FY2026 : From April 2026 to March 2027)

	PI	Proposal title
1	J. Chau (Leibniz Inst. Atmos. Phys.)	Continuous observations of meteor-head echoes and search of Rogue Vertical Drafts in the summer mesosphere using a piggy-back receiving system
2	M. Kohma (Univ. Tokyo)	Observations of radar echoes in the polar mesosphere based on FDI observation
3	A. Saito (Kyoto Univ.)	Observation of the field-aligned coherent echo from the Antarctic ionosphere
